

# MPOG QI for Learners Workgroup Meeting

April 8, 2025

# Agenda

Recap February 20<sup>th</sup> Discussion

Propose Implementation Options

Group Discussion

Finalize Next Steps

# ***February 20<sup>th</sup> Meeting Recap: Summary of MPOG Interventions***

1. Develop ability to select measures relevant for groups of residents (ie CA1s). Allow for measure selection for residents that could be updated throughout residency - independent of the measures selected for the overall department
2. Compile a list of MPOG QI Measures that are education-focused
3. Create additional phenotypes for relevant 'experiences' for residents (massive transfusion, for example)
  - Allow these filters within QI Reporting for department leaders to track experiences
  - Allow residents to use these filters within their individual dashboard to assess progress/opportunities
4. Need a view in QI Reporting for department leaders to track performance for learners

## ***Proposed Implementation Options (per Coordinating Center Discussion)***

1. Curate a list of measures most relevant for residents/fellows/SRNAs and develop ability to view within QI Reporting
2. Update Provider Contacts to enable sites to manually assign resident year (residency start date or CA-1, 2, 3, etc.) – Could add this as a filter/output in DataDirect
3. Add SRNAs to provider feedback emails – *in progress*
4. Create new filter in QI Reporting for Provider Role (attending, resident, SRNA, CRNA, fellow)
5. Create separate email group for learners to enable different measures as compared to other providers on the provider feedback emails

## ***Group Discussion***

- Which measures has your department found beneficial for learners?
- Could these measures be the same across all institutions, or specific to each institution?
- Would a separate dashboard to view these measures within QI Reporting be useful?

Measure List

## Group Discussion

- If Provider Contacts was updated to allow for resident year to be added, would your department find this beneficial for data queries/reporting?
- Would you maintain this information?

# Group Discussion

- Adding SRNAs to Provider Feedback Emails
- Requires update to Provider Contacts Tool & Staff Roles phenotype
- Once updated, will allow for SRNAs to be a standalone comparison group in provider feedback emails

## Group Discussion

Entity

**Vanderbilt Children's  
Hospital**

Time Period

Past 12 Months

Additional Filters

+ Location

> Case Attributes

> Demographics

Add New Filter option in QI Reporting Tool for Provider Role:

### Provider Type

- Attending
- CRNA
- CAA
- Learners
  - Resident/Fellow
  - SRNA

## ***Group Discussion – separate measures on emails***

- Would this be in addition to the facility specific measures or replacing? If in addition, would you expect this in a single email or is 2 emails ok?
- Who would maintain this at sites? What would the governance look like?

## ***Discussion***

- Other feedback/ideas?
- Finalize Next Steps
