Multicenter Perioperative Outcomes Group (MPOG)
PCRC Meeting Notes – Monday, August 8, 2014

Active PIs		In Progress PIs Continued	
P	Michael Avidan, MD - Wash U	A	Brian Bateman, MD - MGH
A	Michael Aziz, MD - OHSU	A	Matthias Eikermann, MD - MGH
A	Mitchell Berman, MD - Columbia	A	Bassam Kadry, MD - Stanford
P	Daniel Biggs, MD – Oklahoma	P	Fabian Kooij, MD – AMC Amsterdam
A	Randal Blank, MD - Virginia	A	Warren Levy, MD – Pennsylvania
A	Robert Craft, MD –Tennessee	A	Philip Lirk, MD – AMC Amsterdam
A	Douglas Colquhoun, MD –Virginia	A	Marco Navetta, MD – Santa Barbara Cottage
P	Jurgen de Graaff MD – Utrecht	A	David Robinowitz, MD - UCSF
A	Karen Domino, MD, MPH – U of Washington	P	Leif Saager, MD – Cleveland Clinic
A	Marcel Durieux, MD, PhD- Virginia	A	Robert Schonberger, MD - Yale
A	Jerry Epps, MD - Tennessee	A	Scott Springman, MD – Wisconsin
A	Jesse Ehrenfeld, MD - Vanderbilt		
P	Ana Fernandez-Bustamente, MD - Colorado	**Chairs**	
A	Peter Fleishut, MD – Weill-Cornell	A	David C. Adams, MD - Vermont
A	Alexander Friend, MD –Vermont	A	Jerry Epps, MD – Tennessee
A	Daniel Helsten, MD – Wash U	A	Timothy Morey, MD - Florida
A	Leslie Jameson, MD - Colorado	A	Kevin Tremper, PhD, MD - Michigan
P	Sachin Kheterpal, MD - Michigan	A	Warren Sandberg, MD, PhD – Vanderbilt
P	Kai Kuck, MD – Utah	A	Wilton van Klei, MD – Utrecht
A	Bhiken Naik, MD - Virginia	**MPOG**	
A	Bala Nair, PhD – U of Washington	P	Mark Dehring
P	Nathan Pace, MD – Utah	X	Genevieve Bell
P	William Paganelli, MD – Vermont	X	Tory Lacca, MBA
P	W. Pasma - Utrecht	P	Nirav Shah, MD
A	Kelley Smith, MD – Utah	P	Amy Shanks, MS, PhDc
A	Wilton van Klei, MD – Utrecht	P	Tyler Tremper
A	Jonathan Wanderer, MD - Vanderbilt	A	John Vandervest
A	Kevin Wethington, MD - Utah		

Ground Rules for PCRC:

1. Each protocol must have specific testable hypothesis with data available in MPOG data structure
2. People requesting specific data elements must also supply that data type to MPOG. If you don't submit that data type currently, then you can't get that type of data type out. However, if you have a co-investigator from another site that does supply that data, then you can ask for that type of data. The reason is so someone on the research team understands the limitations of each data element being requested and used
3. To ensure that there is not a lack of clarity about what the status of the proposal is, each proposal will get the following overall decision at the end of each presentation and discussion
   a. Accept with minimal or no changes required
      i. E-mail revision to PCRC
   b. Accept with moderate changes required

          i.   Represent at a future PCRC

         ii.   E-mail Revisions to PCRC

    c.   Revise and reconsider at future meeting

    d.   Reject

4.   Meeting will be recorded to be shared later with members of MPOG via the MPOG website. There were no objections to this via the members that were on the call.

1. Roll call
2. Demo of MPOG Application
   a. Export Utility
      i. Bill P: likes the idea of one utility
      ii. Dan B: agnostic, but easier with one utility
      iii. User ID and Password (for a specific user, not site specific)
         1. Will be common to all MPOG tasks (QI Dashboard)
         2. No disagreement with this
      iv. History tab
         1. No sites need case specific access to audit history from History Tab now, but would like in a future version
      v. Re- upload options
         1. Applying to all destinations makes sense (Dan). Want fidelity between both databases.
         2. Need to reach out to Samba/AQI and other destination to let them know they may be getting updates to cases. – Sachin/Nirav
      vi. General Questions
         1. Wietze: Will date range appear for Test uploads? Yes.
         2. Need to consider adding date range for producton data as well - Mark
         3. E-mail reminder flag to submit data? Several yes. No dissenters.
   b. Case validation utility
      i. Feedback: Dan: model is only for 20/ 6 month. Consider a more frequent model with same number of cases (i.e 4/month or 10/quarter) - Mark
      ii. QI data needs to validated more frequently (monthly). Should be part of e-mail reminders – Mark/Tory
   c. Web based concept browser
      i. Agreement to keep site specific data behind user name and password
      ii. Agreement to keep aggregate counts available without user name and password
   d. Initial Screen
      i. Ok with no icons
      ii. *Edit connections*: described profiles functionality
3. Amy sent out revisions for PCRC proposals
4. Central Statistics server: figuring out pricing with SAS
   a. In the meantime, will have SPSS, R, R Studio
5. MPOG Meeting
   a. At Hilton New Orleans Riverside Convention Center, Room HEC Room C
   b. Send out invite with location details - Tory
