

# Variable Mapping Tips Non-Epic sites

\*See the Getting Started – Import Manager Variable Mapping presentation first

## Variable Mapping/Case Viewer Basics

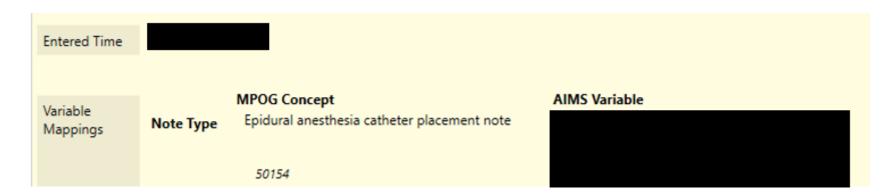

- When concepts are mapped, they will appear in Case Viewer with details about the variable/concept
  - Concept = What MPOG concept the variable is mapped to
  - Value = text description, usually matches what is documented in the EHR
  - Observed time = time the procedure/event/care was performed (not necessarily the same as when it was documented). If observed time is not documented, MPOG will default to using the time the note was documented (entered time).

## Variable Mapping/Case Viewer Basics

- Entered time = Time the variable was documented
- MPOG Concept = concept name and ID that the variable is mapped to
- AIMS Variable = the name and ID number of the variable in the EHR

## Blocks/Spinals/Epidurals

- Blocks: search 'block' 'epidural' 'regional' and 'neuraxial' in <a href="Concept Browser">Concept Browser</a> for MPOG concepts.
  - Epidural
  - Block
  - Paresthesia
  - Spinal
  - Labor epidural
- Blocks should have at least these variables mapped: Type, Needle, Location, Technique, Time

\*Note that there are concepts for Regional/Neuraxial blocks (which should be used if your site documents both blocks under the same variable) and separate Regional Block and Neuraxial Block concepts (which should be used if your site documents blocks under separate variables).

## **Blocks**

- Examples of how we expect these procedures to look in Case Viewer
- Bold text means that it has a child note (Observation Type Details variable mapped)
  - Click on the bold text to open the child notes

# Spinal or Epidural Examples

Concept	Neuraxial - spinal or epidural performed	
Value	Spinal	
Observed Time		
Details	Concept	Original Variable
Details	Vertebral Interspace Final	interspace
	Compliance - Attending present for anesthesia procedure	block/procedure attestation
	Procedures - Vascular Access - Ultrasound	ultrasound guided
	Patient Position	patient position
	Anesthesia Machine Checked	monitors and equipment checked
	Patient Identified	patient identified
	Pre-Incision Timeout	timeout performed
	Categorized note: Regional or neuraxial note	anesthesia block drug
	Peripheral IV Sites Checked	IV checked
	Consent Confirmed	anesthesia consent
	Spinal Performed	spinal
	Regional Anesthesia (Misc)	anesthetic indication
	General - Preoperative evaluation date/time	pre-op evaluation

Observed Time   Concept	Concept	Neuraxial technique - Combined Spinal / Epidural technique note	
Details    Concept	Value	CSE / DPE	
Compliance - Attending present for anesthesia procedure Procedures - Vascular Access - Ultrasound Patient Position Epidural Vertebral Interspace Final Epidural Needle Type Epidural Needle Diameter (Gauge) Epidural Loss of Resistance (Saline/Air) Epidural Catheter Type Epidural Catheter Type Epidural Catheter Withdrawn to Depth (cm) Anesthesia Machine Checked Patient Identified Pre-Incision Timeout Categorized note: Regional or neuraxial note Aspiration of Blood/CSF Spinal/Epidural Technique Spinal/Epidural Technique Peripheral IV Sites Checked Consent Confirmed Regional Anesthesia (Misc)  Dock/procedure attestation block/procedure attestation ultrasound ultrasound guided patient position ultrasound guided patient position epidural location epidural needle type epidural technique peidural needle gauge epidural rechnique epidural rechnique peidural rechnique Combined Epidural Type CSF Spinal/Epidural Technique Peripheral IV Sites Checked IV checked Consent Confirmed Regional Anesthesia (Misc) anesthetic indication	Observed Time		
Compliance - Attending present for anesthesia procedure Procedures - Vascular Access - Ultrasound Patient Position Epidural Vertebral Interspace Final Epidural Needle Type Epidural Needle Diameter (Gauge) Epidural Loss of Resistance (Saline/Air) Epidural Loss of Resistance Depth (cm) Epidural Catheter Type Epidural Catheter Withdrawn to Depth (cm) Anesthesia Machine Checked Patient Identified Pre-Incision Timeout Categorized note: Regional or neuraxial note Aspiration of Blood/CSF Spinal/Epidural Technique Spinal/Epidural Technique Spinal/Epidural Technique Peripheral IV Sites Checked Consent Confirmed Regional Anesthesia (Misc) Interspict of Augustance Sultrasound Interspict of Augustance Interspict of Inter	Dotaile	Concept	Original Variable
Patient Position Epidural Vertebral Interspace Final Epidural Needle Type Epidural Needle Diameter (Gauge) Epidural Loss of Resistance (Saline/Air) Epidural Loss of Resistance Depth (cm) Epidural Catheter Type Epidural Catheter Withdrawn to Depth (cm) Anesthesia Machine Checked Patient Identified Pre-Incision Timeout Categorized note: Regional or neuraxial note Aspiration of Blood/CSF Spinal/Epidural Technique Spinal/Epidural Technique Peripheral IV Sites Checked Consent Confirmed Regional Anesthesia (Misc)  Peripheral IV Sites Checked Regional Anesthesia (Misc)  Pepidural Ineedle type epidural needle gauge epidural needle gauge epidural technique epidural technique epidural technique epidural technique epidural technique epidural needle type epidural technique fepidural catheter type epidural technique fepidural timeout performed anesthesia block drug CSF aspirated CSF aspirated V checked Consent Confirmed anesthesia consent anesthesia consent	Details	Compliance - Attending present for anesthesia procedure	block/procedure attestation
Epidural Vertebral Interspace Final epidural location Epidural Needle Type epidural needle type Epidural Needle Diameter (Gauge) epidural needle gauge Epidural Loss of Resistance (Saline/Air) epidural technique Epidural Loss of Resistance Depth (cm) epidural needle insertion depth (cm) Epidural Catheter Type epidural catheter type Epidural Catheter Withdrawn to Depth (cm) catheter at skin depth (cm) Anesthesia Machine Checked monitors and equipment checked Patient Identified patient identified Pre-Incision Timeout timeout performed Categorized note: Regional or neuraxial note anesthesia block drug Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Procedures - Vascular Access - Ultrasound	ultrasound guided
Epidural Needle Type Epidural Needle Diameter (Gauge) Epidural Loss of Resistance (Saline/Air) Epidural Loss of Resistance Depth (cm) Epidural Catheter Type Epidural Catheter Withdrawn to Depth (cm) Anesthesia Machine Checked Patient Identified Pre-Incision Timeout Categorized note: Regional or neuraxial note Aspiration of Blood/CSF Spinal/Epidural Technique Spinal/Epidural Technique Peripheral IV Sites Checked Consent Confirmed Regional Anesthesia (Misc) Epidural needle type epidural needle type epidural needle gauge epidural rechnique epidural technique epidural rechnique epidural needle type epidural technique epidural technique epidural needle type epidural technique epidural rechnique epidural needle type epidural technique epidural rechnique epidural needle type epidural rechnique epidural rechnique epidural needle gauge epidural rechnique epidural r		Patient Position	patient position
Epidural Needle Diameter (Gauge) epidural needle gauge Epidural Loss of Resistance (Saline/Air) epidural technique Epidural Loss of Resistance Depth (cm) epidural needle insertion depth (cm) Epidural Catheter Type epidural catheter type Epidural Catheter Withdrawn to Depth (cm) catheter at skin depth (cm) Anesthesia Machine Checked monitors and equipment checked Patient Identified patient identified Pre-Incision Timeout timeout performed Categorized note: Regional or neuraxial note anesthesia block drug Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Epidural Vertebral Interspace Final	epidural location
Epidural Loss of Resistance (Saline/Air) epidural technique Epidural Loss of Resistance Depth (cm) epidural needle insertion depth (cm) Epidural Catheter Type epidural catheter type Epidural Catheter Withdrawn to Depth (cm) catheter at skin depth (cm) Anesthesia Machine Checked monitors and equipment checked Patient Identified patient identified Pre-Incision Timeout timeout performed Categorized note: Regional or neuraxial note anesthesia block drug Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Epidural Needle Type	epidural needle type
Epidural Loss of Resistance Depth (cm) Epidural Catheter Type Epidural Catheter Type Epidural Catheter Withdrawn to Depth (cm) Anesthesia Machine Checked Patient Identified Pre-Incision Timeout Categorized note: Regional or neuraxial note Aspiration of Blood/CSF Spinal/Epidural Technique Spinal/Epidural Technique CSE Peripheral IV Sites Checked Consent Confirmed Regional Anesthesia (Misc) Epidural representation of epidural or neuraxial note Epidural needle insertion depth (cm) epidural reached (catheter type epidural catheter type epidural needle insertion depth (cm) epidural needle insertion depth (cm) epidural needle insertion depth (cm) epidural catheter type epidural needle insertion depth (cm) epidural catheter type epidural reacheter type epidural needle insertion depth (cm) monitors and equipment checked epidural Technique CSF aspirated Combined Epidural Type CSE Peripheral IV Sites Checked IV checked anesthesia consent anesthesia consent		Epidural Needle Diameter (Gauge)	epidural needle gauge
Epidural Catheter Type Epidural Catheter Withdrawn to Depth (cm) Anesthesia Machine Checked Patient Identified Pre-Incision Timeout Categorized note: Regional or neuraxial note Aspiration of Blood/CSF Spinal/Epidural Technique Spinal/Epidural Technique CSE Peripheral IV Sites Checked Consent Confirmed Regional Anesthesia (Misc) Epidural Catheter Type epidural catheter type catheter at skin depth (cm) monitors and equipment checked patient identified patient identified patient identified patient identified catheter at skin depth (cm) monitors and equipment checked anesthesia block drug CSF aspirated CSF aspirated CSF aspirated CSF Spinal/Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked anesthesia consent anesthesia consent anesthetic indication		Epidural Loss of Resistance (Saline/Air)	epidural technique
Epidural Catheter Withdrawn to Depth (cm)  Anesthesia Machine Checked  Patient Identified  Pre-Incision Timeout  Categorized note: Regional or neuraxial note  Aspiration of Blood/CSF  Spinal/Epidural Technique  Spinal/Epidural Technique  CSE  Peripheral IV Sites Checked  Consent Confirmed  Regional Anesthesia (Misc)  Catheter at skin depth (cm)  monitors and equipment checked  timeout performed  anesthesia block drug  CSF aspirated  CSF aspirated  Combined Epidural Type  CSE  IV checked  anesthesia consent  Regional Anesthesia (Misc)  anesthetic indication		Epidural Loss of Resistance Depth (cm)	epidural needle insertion depth (cm)
Anesthesia Machine Checked monitors and equipment checked Patient Identified patient identified Pre-Incision Timeout timeout performed Categorized note: Regional or neuraxial note anesthesia block drug Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Epidural Catheter Type	epidural catheter type
Patient Identified patient identified Pre-Incision Timeout timeout performed Categorized note: Regional or neuraxial note anesthesia block drug Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Epidural Catheter Withdrawn to Depth (cm)	catheter at skin depth (cm)
Pre-Incision Timeout timeout performed Categorized note: Regional or neuraxial note anesthesia block drug Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Anesthesia Machine Checked	monitors and equipment checked
Categorized note: Regional or neuraxial note anesthesia block drug Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Patient Identified	patient identified
Aspiration of Blood/CSF CSF aspirated Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Pre-Incision Timeout	timeout performed
Spinal/Epidural Technique Combined Epidural Type Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Categorized note: Regional or neuraxial note	anesthesia block drug
Spinal/Epidural Technique CSE Peripheral IV Sites Checked IV checked Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Aspiration of Blood/CSF	CSF aspirated
Peripheral IV Sites Checked IV checked  Consent Confirmed anesthesia consent  Regional Anesthesia (Misc) anesthetic indication		Spinal/Epidural Technique	Combined Epidural Type
Consent Confirmed anesthesia consent Regional Anesthesia (Misc) anesthetic indication		Spinal/Epidural Technique	CSE
Regional Anesthesia (Misc) anesthetic indication		Peripheral IV Sites Checked	IV checked
regional vinestresia (misc)		Consent Confirmed	anesthesia consent
General - Preoperative evaluation date/time pre-op evaluation		Regional Anesthesia (Misc)	anesthetic indication
		General - Preoperative evaluation date/time	pre-op evaluation

## Airway

- Search 'airway' 'ETT' 'Laryngeal' and 'intubation' in <u>Concept Browser</u> for MPOG concepts
  - ETT
  - Tube
  - Intubat
  - LMA
  - Airway
  - Mask
  - Difficult
- Concept 50074 Airway Type should be used if your site has one variable to document multiple airway types (i.e. ETT and LMA)

# Airway Examples

Concept	Airway Type	
Value	Airways-airway interventions	
Observed Time		
Details	Concept	Original Variable
. Details	Compliance - Attending present for anesthesia procedure	block/procedure attestation
-	Airway Type	airway interventions
-	Intubation Observed to Be Difficult	difficult airway
-	Mask Ventilation Difficulty (Scaled)	mask assessment prior to intubation
-	Laryngoscopy Blade Type/Size	INVISIBLE LARYNGOSCOPE BLADE S
-	Laryngoscopy Blade Type/Size	blade size
-	Intubation Approach	endotracheal tube placement
-	Intubation Number of Attempts	number of attempts
-	Direct Laryngoscopy View	Cormack & Lehane grading
-	Endotracheal Tube Size	tube size (mm)
-	Endotracheal Tube Type	cuffed
-	Endotracheal Tube Type	tube type
-	Endotracheal Tube Secured Distance	ETT insertion depth
-	Endotracheal Tube Secured Distance	ETT to teeth (cm)
-	Tube Secured Point	ETT measured from
-	Patient Position	patient position
-	Breath Sounds Auscultated	auscultation
-	Preoxygenation/Denitrogenation	preoxygenation performed
-	Intubation Device/Adjunct (Oral)	laryngoscope type
	Intubation Device/Adjunct (Oral)	intubation method
	GA Induction Type	rapid sequence induction
	Sustained EtCO2 Observed	CO2 detection
-	Intubation Comment	ET tube placement confirmed by
-	Intubation Comment	ET tube placement confirmed by
	Assessment and Plan - Emergency Procedure	procedure urgency

Concept	Intubation - ETT Placed	
Value		
Observed Time		
Details	Concept	Original Variable
Details	Unmapped Variable	Cuffed
	Airway Verification (Chest rise, CO2, breath sounds)	Placement Verification
	Mask Ventilation Difficulty (Scaled)	Mask Ventilation
	Laryngoscopy Blade Type/Size	Blade Size
	Endotracheal Tube Size	Single Lumen Tube Size
	Endotracheal Tube Type	ETT Type
	Intubation Device/Adjunct (Oral)	Technique
	Intubation Device/Adjunct (Oral)	Laryngoscope
	Intubation View	Grade View
	Lines/Tubes/Drains (Misc)	Location

#### **Arterial Lines**

- Type "arterial line" (with quotations) in <u>Concept Browser</u> for MPOG concepts. Arterial line should have at least these variables mapped: insertion (50662), location (50445), size (50446)
  - Art
  - Arterial
  - Dampened
  - Transducer

#### Central Lines

• Search "Central Venous" (with quotations) in <u>Concept Browser</u> for MPOG concepts.

Concept	Procedures - Central Venous Access placed	
Value	Central Line-IV access type;procedural supplies	
Observed Time		
Details	Concept	Original Variable
Details	Unmapped Variable	additional CVC for CVP monitoring
	Compliance - Attending present for anesthesia procedure	block/procedure attestation
	Procedures - Vascular Access - Ultrasound	ultrasound guided
	Intubation Number of Attempts	number of attempts
	Patient Position	patient position
	Echocardiogram Observation	transesophageal echocardiogram
	Lines/Tubes/Drains (Misc)	IV access type
	Lines/Tubes/Drains (Misc)	catheter insertion depth (cm)

## Additional Notes

- When a procedure variable has multiple uses (lines, CT, etc.) map to 50665 Procedures Other unlisted procedure.
- Map Non-Invasive Blood Pressure location to 3266 Noninvasive blood pressure cuff location
- Map patient position to 3096 'Positioning'
- PONV assessment: If the values listed under 'Examine' are y/n, map to 90010 PONV Assessment. If the values are text, i.e. vomiting, diarrhea, etc., map to 50227 GI symptoms
- Cardiopulmonary Bypass Start should be mapped to 50410 Cardiopulmonary bypass initiated (full/partial/left-heart) and Cardiopulmonary Bypass End should be mapped to 50409 -Cardiopulmonary bypass (full/partial/left-heart) terminated. The concepts that have 'Perfusion Start' and 'Perfusion End' are used when documented by a Perfusionist

## Additional Notes continued

- Surgical Admission Type Inpatient (500): should be used for a patient that was admitted prior to the procedure (i.e. inpatient who went to OR)
- Surgical Admission Type Admit (502): should be used for patients that were admitted after the procedure (i.e. c-sections)
- OB Frequency of Contractions should be mapped to 3181 Frequency of Contractions
- OB Duration of Contractions should be mapped to 3188 Duration of Contractions
- Make sure that H&P variables and Review of Systems variables are included in the extract
- Preop and PACU notes should also be included in the extract and mapped
