

Data Review: Import Manager Assistant

Import Manager Assistant Overview

IM Assistant provides organized information file processing errors and their current location within the import manager file pipeline.

Contact: support@mpog.zendesk.com

• Note: Site technical teams supporting the MPOG project will want to download the application suite to access IM Assistant.

Log Viewer Overview Check File Columns Parse File Data

Handoff Settings

- Log Viewer: This tab displays the various import manager logs and the handoff queue.
- **Overview**: This tab contains a color-coded grid representing the current status of import manager.
 - *Check File Columns*: This tab enables the user to see which rows in an imported file have the incorrect number of columns.
 - *Parse File Data*: This tab enables the user to view the contents of an imported file.
 - *Handoff Settings*: This tab contains the current settings for handoff for this instance.

MULTICENTER PERIOPERATIVE OUTCOMES GROUP

- Import Log
 - Displays the list of files that have been imported, including those with errors.
 - Files with recent errors are likely still present in the folder designated for the Import Utility and will continue to be retried until they are removed or corrected.
- Consume Log
 - Displays the list of Modules and Target Dates that have been consumed, including those with errors.
 - Errors that have been resolved will still show in the log, but any recent errors may indicate missing data and require attention.

- Handoff Log
 - Displays the modules (and corresponding Target Dates) that have been exported to the MPOG_MAS database(s).
 - Errors that have been resolved will still show in the log, but any recent errors may indicate missing data and require attention.
- Handoff Queue
 - Displays any modules (and corresponding Target Dates) currently queued to be exported to the MPOG_MAS database(s).
 - The assigned Priority helps indicate why the item was queued:
 - Priority 10 = New Data
 - Priority 20 = Re-Imported Data
 - Priority 30 = New Mappings
 - Priority 50 = Missing from MPOG_MAS, Reason Unknown
 - Priority 60 = Missing from MPOG_MAS, Reason Unknown (Patient Level Data)

Contact: support@mpog.zendesk.com

• The filters at the top of the window allow the user to filter by a variety of criteria.

Module All · Target Date Range Select a date 15 to Select a date 15 Had Error Ves Ves No Execution Date Range Select a date 15 to Select a date 15

- *Module*: refers to the type of data.
- *Target date range*: filters the data based on case date of service.
- *Error filtering*: allows the user to view log records with or without errors. Please keep in mind that an error that has occurred may have since been resolved.
- Execution date range: filters the data based on date file processing occurred

- The Log Viewer is limited to the most recent 10,000 rows from each log; however, exporting the logs as a spreadsheet has no row limit and will display all rows.
- To export the logs, click the "Export as a spreadsheet" button at the bottom of the Import Manager Assistant window.

Export as a spreadsheet

 Please include this log when contacting MPOG support about any errors encountered during the Import/Consume/Handoff processes.

Module	Data Included
Cases	Date of Service Operating Room Admission Type Surgical Service Procedure Text Diagnosis Text Organizations (used to determine which MPOG_MAS database to use)
Diagnoses	Hospital Discharge Diagnosis and Professional Fee Diagnosis Codes
Hospital Mortality	Date of Death (in hospital only)
Labs	Formal Labs and Point-of-care Labs
Patients	Patient Name MRN Gender Ethnicity Race
	(continued on next slide)

Last Updated: 5/5/2023

Module	Data Included
Payers	Insurance and other payer data
PeriopAdministrations	Fluids and Medications
PeriopObservations	Preoperative Notes Intraoperative Notes Monitor Data
Procedures	Professional Fee Procedure Codes Hospital Discharge Procedure Codes
StaffTracking	Staff sign ins/outs and role (eg attending)

Overview

 Provides a color-coded grid representing the current status of files that were imported. The main grid shows the status broken down by module or "data type" (viewed in rows) and date of service month/year (viewed in columns). Each box represents one month of data.

The color of each box indicates the data status within each month:

- Green- indicates data that has successfully completed all Import Manager steps. If every day of the month has successfully completed processing, display green
- Yellow- indicates data that has successfully completed some steps, but still has further steps to complete. If there are not any errors but data is still being processed for one or more days, display yellow.
- Red- indicates one or more errors. If there are any errors for any day that month, display the month as red.
- Grey- indicates missing data. If there are not any errors, no data is being processed, but there are one or more days without any data, display grey.
- Green/Grey- indicates that there is partial missing data. Some days may be green and some may be grey.

Contact: support@mpog.zendesk.com

Overview – Old Sources

- When sources stop sending data (i.e. change in billing vendor), the boxes for that source will be gray indicating no data for that month.
 - You can click on the 'Hide Old Sources' checkbox to hide any source that hasn't submitted any data in > 12 months.
 - When this is turned on, any row that has not submitted data in this time frame will be hidden
 - This can be turned on or off by the user, but it will be turned off by default

Clicking on any box will show the status of that module per day of that month.

MULTICENTER PERIOPERATIVE OUTCOMES GROUP

- Select any day of the month to reveal the breakdown by source system.
- The source system information will tell you from where the data was extracted from (electronic health record, billing software, etc.).
- You can also see more details about where/what errors may have occurred.
- The status column will show where the data currently is in the transfer process.

Destinati	ion Database Lab Linking Billing Tolerance in Minutes	
Log Viewer MPOG_M		
Overview		
Check File Columns		
Parse File Data		
Handoff Settings		
	Handoff Settings	
	Lab linking refers to which labs are included in a given target date.	
	CaseLinked should be used if all labs for the patients that had a	
	case that day were pulled.	
	 DateLinked should be used if all labs taken that day are 	
	included in the file.	
	 Billing tolerance in minutes adjusts how close timing of a billing code 	
	and a case start time can be to be considered a match.	
	Do NOT change these values without consulting MPOG staff	
	\sim
