

9:00 – 9:30	<b>Welcome and Updates</b> Nirav Shah, MD
9:30 – 10:30	<b>How to Implement Quantitative Neuromuscular Monitoring into Your Practice</b> Ross Renew, MD Mayo Clinic, Florida
10:30 – 10:45	<b>Break</b>
10:45 – 11:30	<b>Reimagining our Patients and Their Care</b> Afton Hassett, PsyD Michigan Medicine
11:30 – 12:00	<b>QI Stories</b> <b>PAIN-01:</b> Chris Wedeven, MD and Amy Poindexter, BSN, RN Holland Hospital <b>PONV-05:</b> Bryan Cohen, MD and Kim Finch, MSN, RN Henry Ford Health System – West Bloomfield

# Welcome!

*We will begin shortly...*

# ASPIRE Collaborative Meeting

July 14th 2023

---

---

A scenic view of a wooden boardwalk overlooking a large body of water. The boardwalk is made of light-colored wood and has a dark metal railing. It runs along a dense forest of green trees. In the distance, the water is a deep blue, and the sky is a clear, bright blue. The text "THANK YOU!" is overlaid in the center of the image in a bold, white, sans-serif font.

**THANK YOU!**

# Post Meeting Information on our website

- Presentation slides, notes, and recordings
- CME Information

Please note, the Performance Review information will not be recorded

# Featured Member July and August

# Upcoming Events

# ACQR Retreat

September 15, 2023

DoubleTree Hotel, Ann Arbor

# **MPOG Annual Retreat**

**October 13, 2023  
San Francisco**

**In person + virtual**

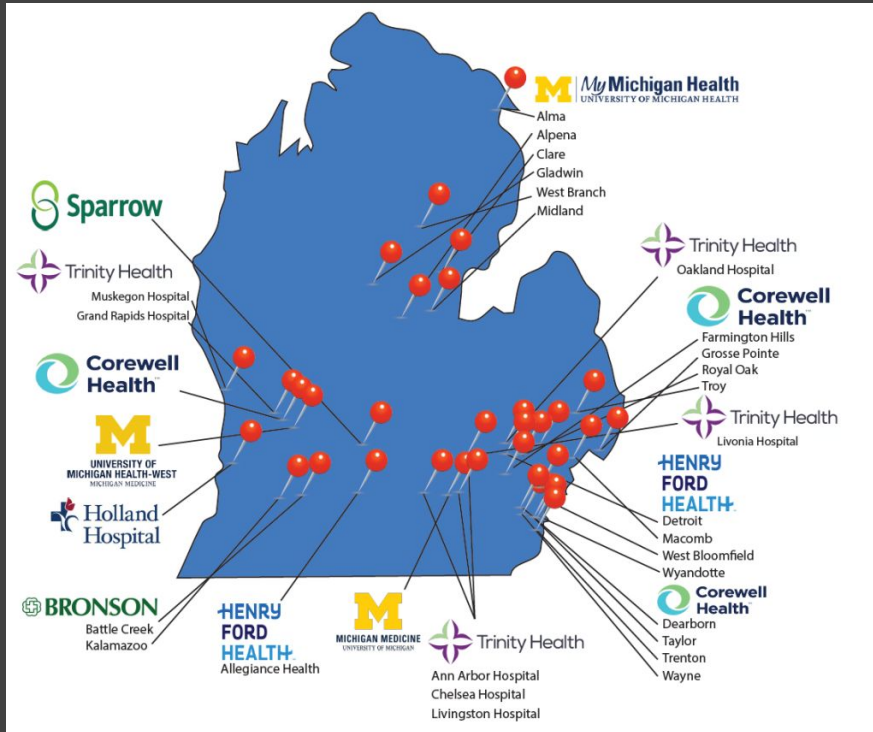

# **Recruitment 2023 - 2024**

# Our perspective and plan

Have had steady recruitment over the last few years

About **35 sites** now across the state

No plans for aggressive recruitment, but open to sites where practice / hospital / IT leaders are aligned

Anticipate a few more sites will be added over time

**Sustainability  
Toolkit  
Complete!**

## Measure Selection History

\*MPOG recommends sites choose between 6-10 measures to focus on. Measure selection can be updated every time but if updated after the third Monday of the month, may not be applied to provider feedback emails until the following month. All measures selected will also be visible on the site-selected measure dashboard.

Update**

# A scalable service to improve healthcare quality through precision audit and feedback

NIH National Library of Medicine, Project #1R01LM013894-01

Zach Landis-Lewis, Allison Janda, Allen Flynn, Nirav Shah

Proposal publication: <https://www.researchprotocols.org/2022/5/e34990/>

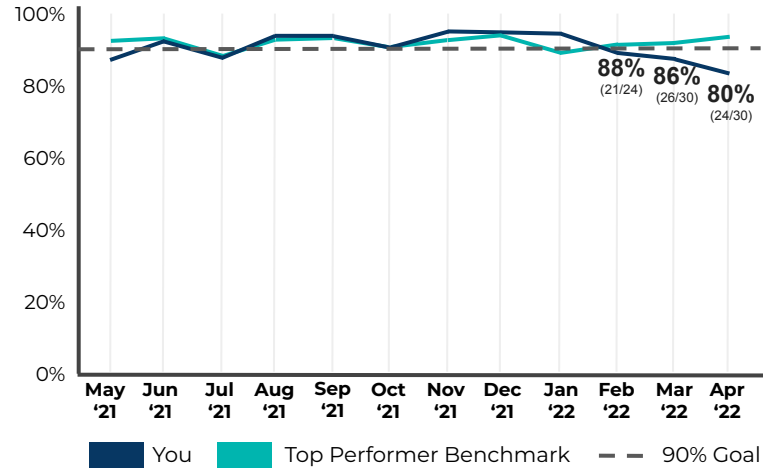

Dear Alex,

Your performance dropped below the goal for the measure: [TEMP-02: Thermoregulation Monitoring - Core Temperature](#).

More information about the rationale for the measure TEMP-02 and how it is calculated [is available here](#).

A case-by-case breakdown of your results are available [at your clinical quality dashboard](#).

Below is your complete MPOG quality performance report...

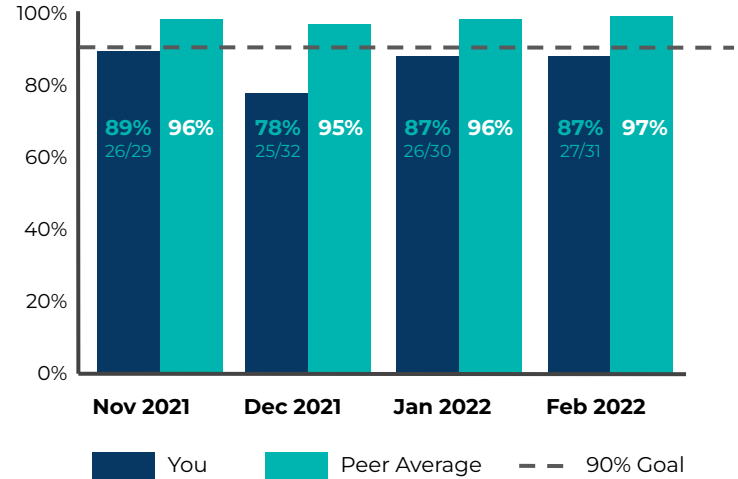

Dear Alex,

You may have an opportunity to improve your performance on measure [NMB-01: Train of Four Taken](#), which measures the percentage of cases with a documented Train of Four (TOF) after last dose of non-depolarizing neuromuscular blocker.

More information about the rationale for the measure and how it is calculated [is available here](#).

Below is your complete MPOG quality performance report...

Claim MOCA® Credit

Dear Alex,

In the last month there was a myocardial infarction within 72 hours after one of your operative cases.

Case details can be accessed by [logging into your clinical quality dashboard](#), and information about how this case was identified [is available in this measure spec on the MPOG website](#).

Below is your complete MPOG quality performance report...

# MPOG Precision feedback R01

## **Specific aims:**

1. Systematically capture recipient requirements and preferences for precision feedback messages
2. Implement and assess a demonstration precision feedback software service
- 3. Assess the effects of a precision feedback service on care quality and engagement via a cluster RCT**

# Progress to date

## **Aim 1:**

- **35 provider interviews, 3 design iterations of prototype messages**
- **Preference survey under completed**

## **Aim 2:**

- **Software development, performance testing, and integration nearing completion**

## **Aim 3:** Assess the effects of a precision feedback service

- Preparation for pilot study in 2023, cluster-randomised trial in 2024

**Subcommittee  
Updates**

## Cardiac Subcommittee

This group meets virtually once per quarter to discuss the development of cardiac-specific quality improvement measures.

[Cardiac Subcommittee](#)

- Scheduling the next meeting for late August
- Plan to review GLU-07 (hypoglycemia avoidance for open cardiac) and GLU-08 (hyperglycemia treatment for open cardiac) prelim data
- GLU-06 (hyperglycemia management for open cardiac) currently available on All Measure and Cardiac dashboards

## Obstetric Subcommittee

This committee of anesthesiologists around the country meets quarterly via web conferencing. Topics of discussion include development of obstetric specific ASPIRE measures and modifications to general measures to accommodate OB procedures. This group provides expert opinion to inform ASPIRE work.

[Obstetrics Subcommittee](#)

- 
- Next OB Subcommittee meeting is scheduled for Nov 8<sup>th</sup> 1pm EST.
  - BP-04 due to be reviewed
  - The group is working on ABX-03 which will look at Azithromycin usage during cesarean deliveries.

# Hip Fractures

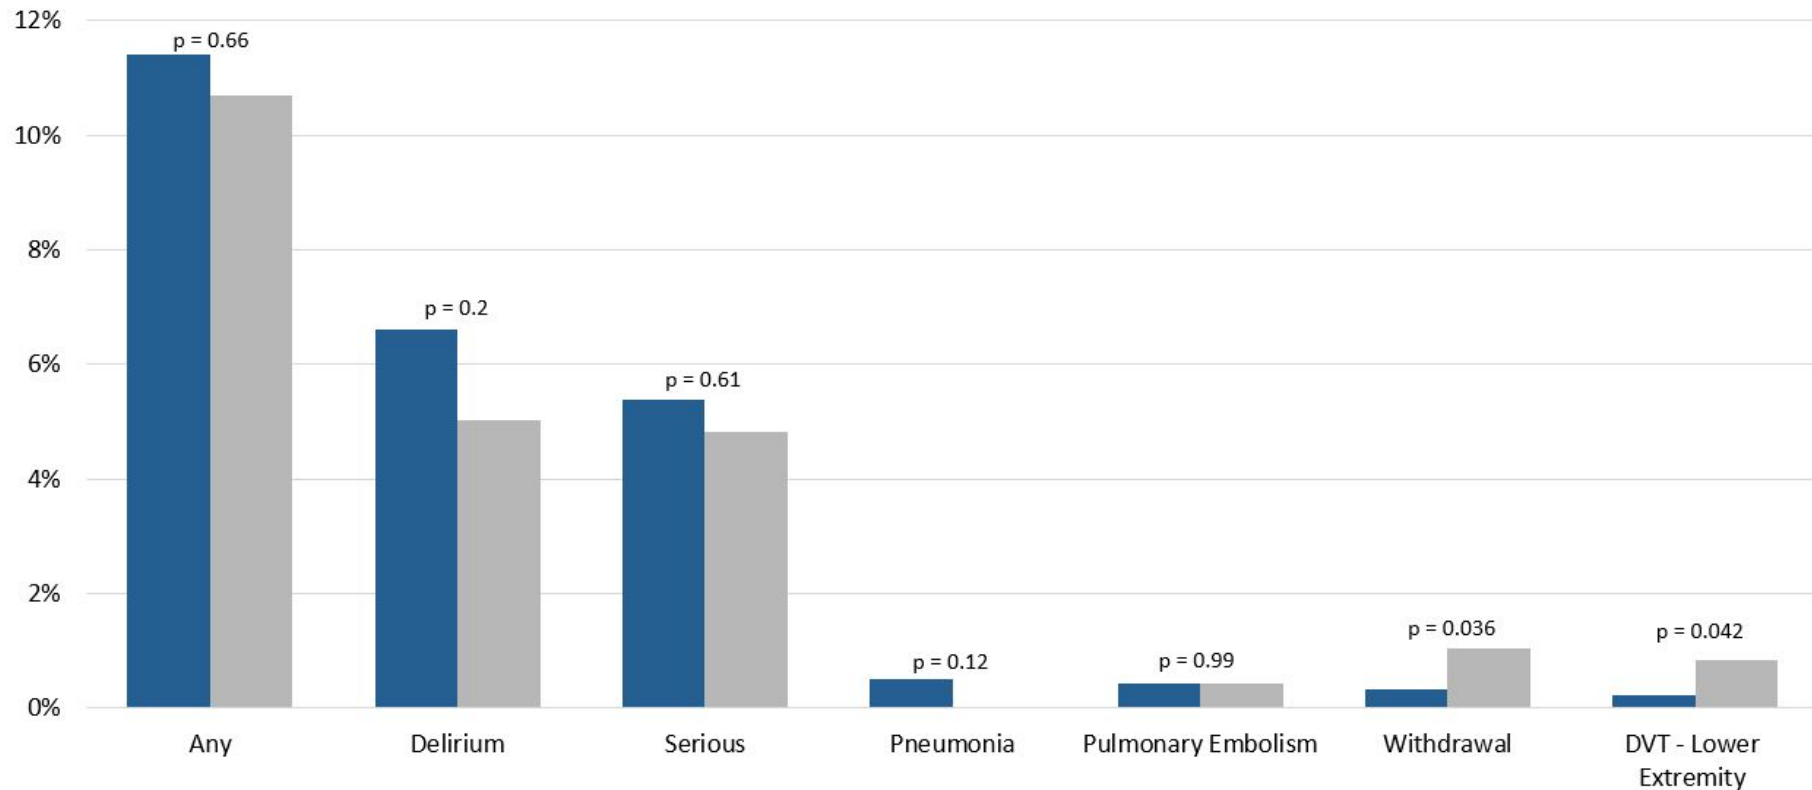

1. Determined areas of common interest (intraop processes of care + outcomes)
2. Developed a data specification across both registries
3. Matched MTQIP cases to ASPIRE cases based on based on case type (via CPT codes), date of service, institution, age, and gender
4. Added in variables of interest across both registries and placed data in a secure location available to both teams
5. MTQIP took lead in analyzing data

# Preliminary Unadjusted Results

## Complication Rates for Hip Fracture (ASPIRE / MTQIP Dataset)

■ General (n=2,132) ■ Non-General (n=477)

# Spinal Anesthesia vs. General Anesthesia for Hip Surgery

MULTICENTER, PRAGMATIC, RANDOMIZED SUPERIORITY TRIAL

1600

Adults,  $\geq 50$  yrs old,  
who could walk  
independently  
before a hip fracture

Spinal  
Anesthesia  
(N=795)

General  
Anesthesia  
(N=805)

Death or inability to  
walk without human  
assistance at 60 days

18.5%

(132 of 712 patients)

18.0%

(132 of 732 patients)

Relative risk, 1.03; 95% CI, 0.84 to 1.27; P=0.83

Spinal anesthesia was not superior to general anesthesia for survival and ambulation;  
the incidence of postoperative delirium was similar in the two groups.

The logo consists of a white circle with a dark blue border, centered on a dark blue background. Inside the circle, the text "ASPIRE Performance Improvement" is written in a bold, dark blue, sans-serif font. "ASPIRE" is on the top line, "Performance" is on the second line, and "Improvement" is on the third line.
