[MORE INFO](#)

Jessica Wren, BSN

Anesthesiology Clinical Quality Reviewer (ACQR)

Henry Ford Macomb and Wyandotte

Henry Ford Hospital

Fifth Annual ACQR Retreat: Success!

- Hybrid event hosted at the DoubleTree hotel in Ann Arbor on September 17th
- Excellent participation with 20 ACQRs in attendance!
- Great opportunity for our Michigan hospitals to collaborate on various QI initiatives
- Presentation materials available on the MPOG [website](#)

Week of October 18th

Numerous enhancements
and fixes CaseViewer,
Data Diagnostics, Case
Validation,

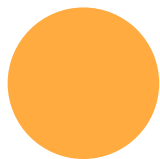

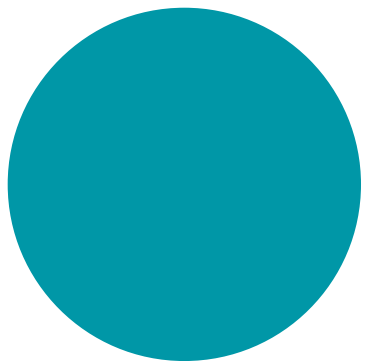

Release notes to be sent
out with upgrade

QI Needs Assessment Survey: Coming Soon!

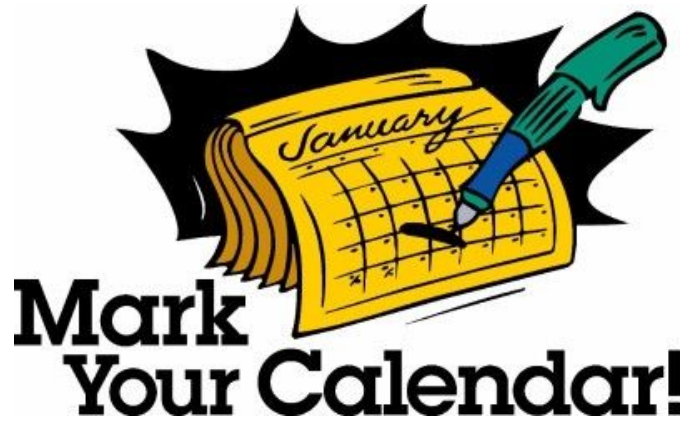

- MPOG distributed a short survey last week to MI Quality Champions and ACQRs
- We want to understand:
 - QI work already being done in your department
 - How can ASPIRE help in 2022?
 - Your unmet QI reporting needs
- Please let us know if you are interested in partnering on a QI project for your site
- Submit survey by October 8th

Upcoming Events

Friday, October 8, 2021, MPOG Retreat
Monday, November 22, 2021, MPOG QC - virtual
2022 Calendar is up to date at mpog.org/calendar/

MPOG Retreat Details

Please [register](#) if you are planning on coming

Keynotes: Eric Topol, MD and Michelle Mello PhD, JD

Afternoon session: after the QI update, small group discussions on a variety of topics. Those in person will divide up. We will have a virtual small group session for interested as well

Roundtable discussions: as before, ad hoc discussions for those that are in person and able to hang around. Will be having a roundtable for each subcommittee (3 to 4 pm PST). No agenda items, just to say hello, and have an informal discussion

**Subcommittee
Updates**

OB Subcommittee Updates

- August 4th meeting [minutes](#) & [slides](#) now available
- Two new OB measures have been released to the 'All Measures' and 'Obstetric' Dashboards
 - **TEMP 05-OB** is the percentage of patients who undergo cesarean deliveries under general or neuraxial anesthesia for whom no body temperature was greater than or equal to 36 degrees Celsius recorded within the 30 minutes immediately before or the 15 minutes immediately after the case. Additional measure specification details available [here](#).
 - **GA 02-OB** is the percentage of cesarean deliveries where general anesthesia was administered after neuraxial anesthesia. Full measure specification details available [here](#).
- Please review the OB dashboard for TEMP 05-OB and GA 02. Consider if the results accurately reflect your practice and if the appropriate cases are being excluded

OB Subcommittee Updates

*Bonus In-Person Meeting: Roundtable Obstetric Anesthesia Discussion at the MPOG Retreat in San Diego **October 8th**

Next meeting: **November 3rd 1pm EST**

For any questions regarding the OB Subcommittee or feedback on the OB measures, please contact: Brooke Szymanski-Bogart bmiszy@med.umich.edu

Cardiac Subcommittee Updates

- September 10th meeting [minutes](#) & [slides](#) now available
- New post-bypass hypothermia avoidance measure is being validated and will be released to the 'All Measures' and 'Cardiac' Dashboards
 - **TEMP 06-C** is the percentage of adult patients who undergo open cardiac surgical procedures for whom the last non-artifact body temperature prior to anesthesia end was greater than or equal to 35.5 degrees Celsius. Additional measure specification details available [here](#).
- A countermeasure for on-bypass hyperthermia avoidance is also being developed and we're requesting perfusionist input
 - Please reach out to ajanda@umich.edu if you have any perfusionists who would like to join a subgroup to help develop this measure!
- Next meeting: December, 2021

**Measure
Updates
& Feedback**

PAIN 01 and 02 (use of non opioid adjuncts) Attribution

Several sites wish to include measure performance as part of provider emails

Inaccurate to assign attribution related to a specific time period (induction, emergence) due to variation in administration of adjuncts

Decision: assign attribution to all providers providing care

Will not affect sites who wish to view this measure at an institutional level only

Measure Review - NMB 02

Dr. Tim Dubovoy

Measure Review - NMB 01

Drs. Alvin Stewart and Peter Panagopoulos

Thank You!
