

Registry Integration: STS Import Tool

STS Import Tool

- To use the STS import tool:
 - First use your STS vendor application to extract a harvest file containing MRNs (or SSNs if MRNs are not available).
 - The instructions for different vendors in subsequent slides.
 - Once you have a harvest file, use the MPOG Application Suite to input this data into your local MPOG database.
 - The data can then be PHI scrubbed and transferred to the central repository.

STS Harvest Schedule

Adult Cardiac Surgery Database - 2023

	Harvest Submission Window Close	Opt-Out Date	Includes Procedures Performed Through:	Report Posting	Comments
Harvest 1	2/10/2023	02/14/2023	12/31/2022	Spring 2023	Star Rating
Harvest 2	5/19/2023	05/23/2023	3/31/2023	Summer 2023	
Harvest 3	8/18/2023	8/22/2023	6/30/2023	Fall 2023	Star Rating
Harvest 4	11/10/2023	11/14/2023	9/30/2023	Winter 2023	

General Thoracic Surgery Database - 2023

	Harvest Submission Window Close	Opt-Out Date	Includes Procedures Performed Through:	Report Posting	Comments
Spring 2023	3/3/2023	3/7/2023	12/31/2022	Summer 2023	Star Rating
Fall 2023	9/8/2023	9/12/2023	6/30/2023	Winter 2023	Star Rating

Congenital Heart Surgery Database - 2023

	Harvest Submission Window Close	Opt-Out Date	Includes Procedures Performed Through:	Report Posting	Comments

Fall 2023	9/15/2023	9/19/2023	6/30/2023	Winter 2023	

STS Harvest Schedule

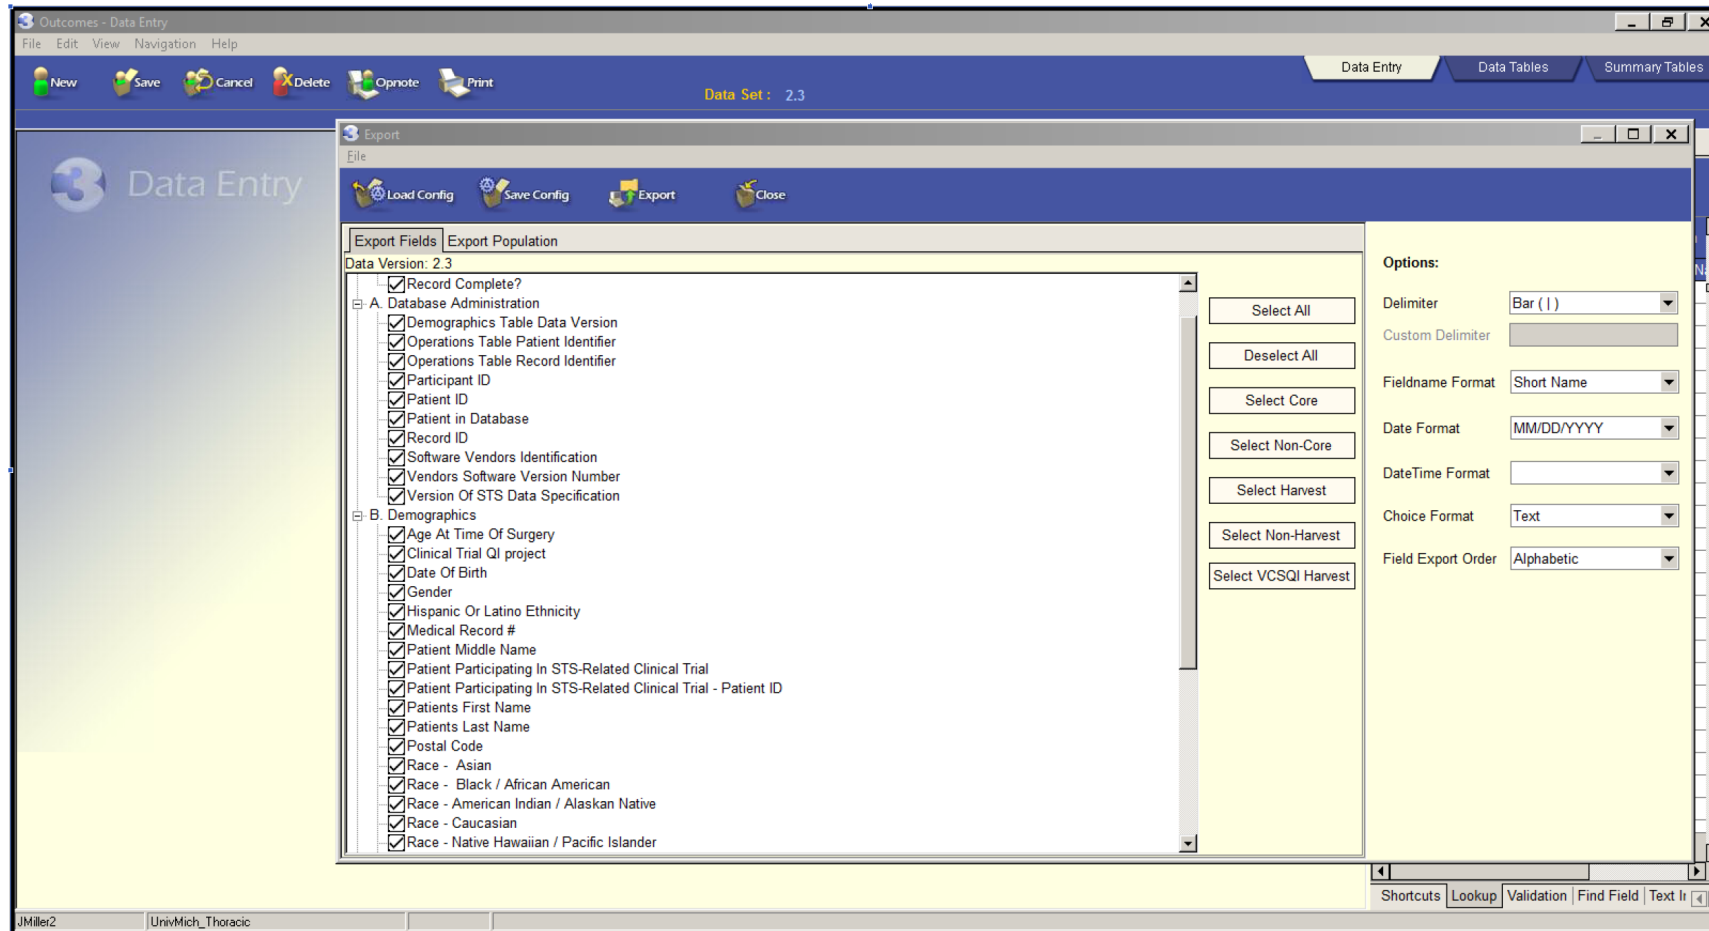

- Latest STS Harvest schedule available [here](#)

Vendor Application Instructions: ARMUS

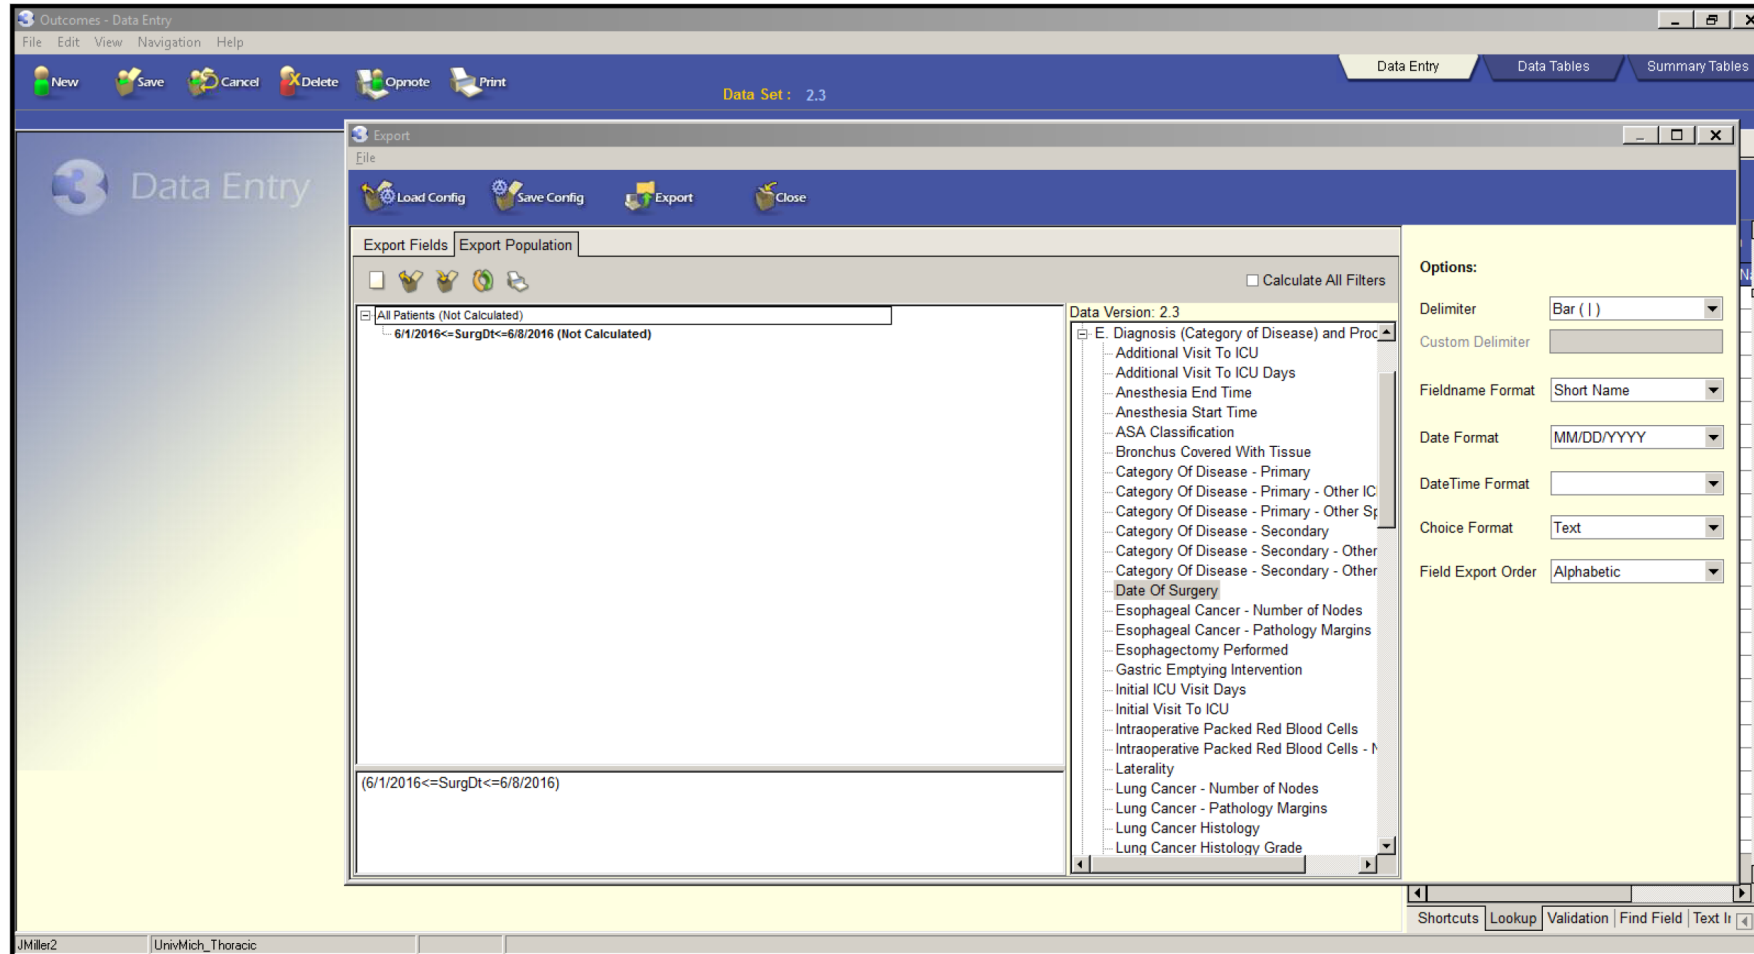

1. File → Export → Select All
2. Pick Date Range: Chose field within Diagnoses and Procedures → Date of Surgery → add date range as filter
3. Fieldname Format: Short Name
4. Choice Format: Choose Harvest (codified values)
5. Field Export Order: Automatic
6. Export as a .dat file

Vendor Application Instructions: ARMUS

Vendor Application Instructions: ARMUS

Vendor Application Instructions: LumedX

1. Select from the drop-down which STS version you would like to pull data for, then click the “play” button

Vendor Application Instructions: LumedX

2. Enter your 5-digit participant ID into the box that pops up.

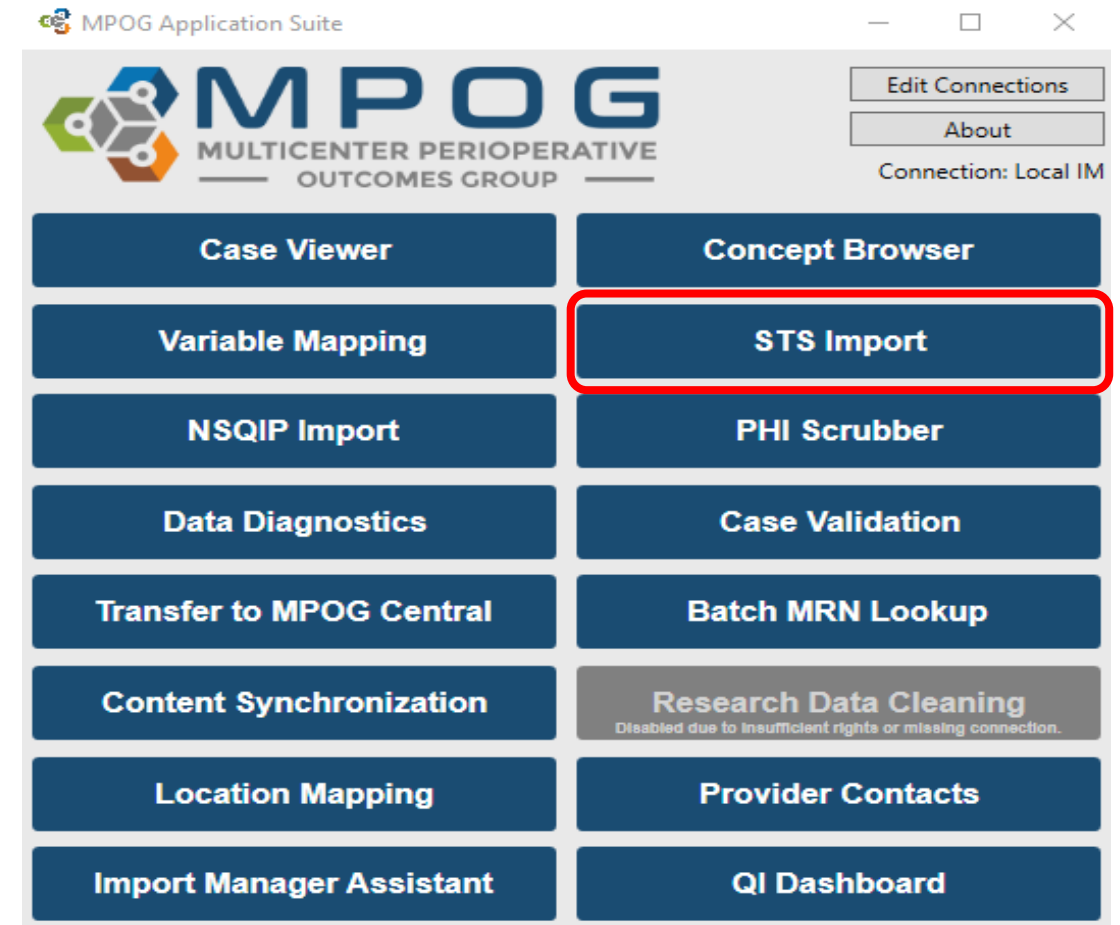

Vendor Application Instructions: LumedX

3. Specify the date range that you would like to extract data for, then click OK

MPOG Import

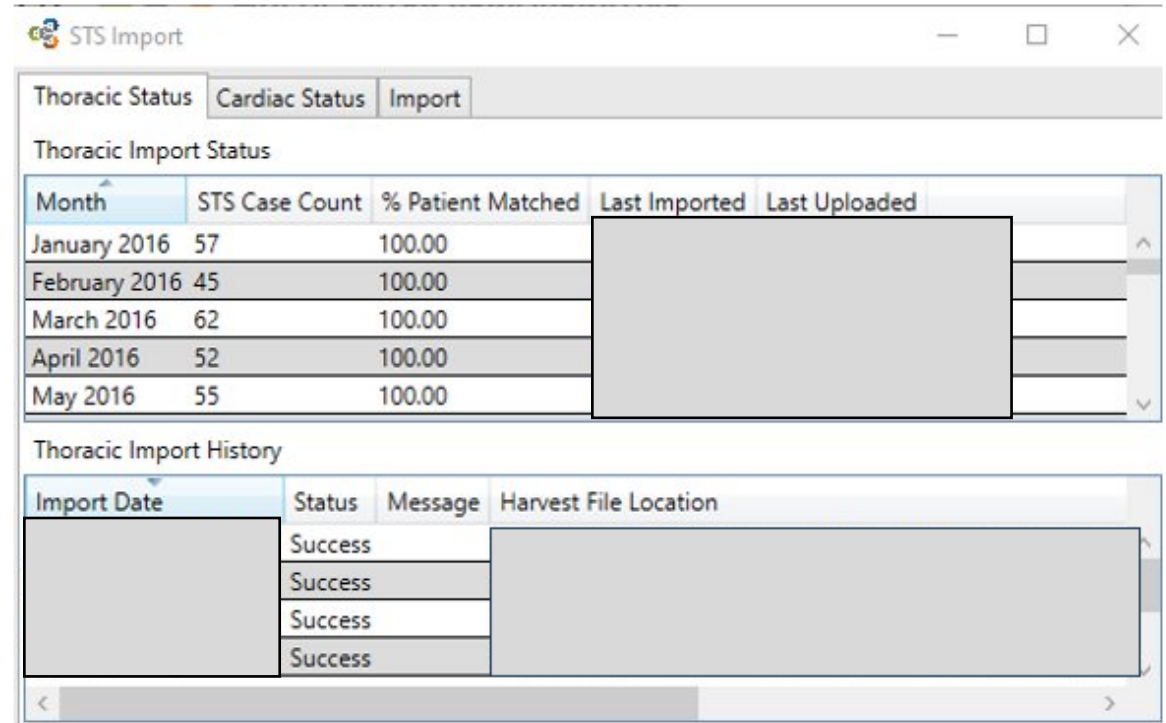

- Once you have your harvest file ready, open the MPOG Application Suite.
- Open the STS Import application.

MPOG Import

- The first screen will show you the import status including:
 - Number of Cases
 - What percentage of those STS records have been patient-matched locally
 - Which months of data have been imported
 - Date of last upload

Click on the import tab to start an import of a harvest file

MPOG Import

4. Locate your STS harvest file using the “browse” button, then select if you are going to match on MRN or SSN (MRN preferred). Use the external matching CSV file option only in MRNs or SSNs are not populated directly within the harvest file

The screenshot shows the 'STS Import' application window. It has three tabs: 'Thoracic Status', 'Cardiac Status', and 'Import'. The 'Import' tab is active. The window contains the following fields and controls:

- Harvest file location:** A text box containing 'S:\Aneslab_Shared\MPOG\ASPIRE\Institutions\Universit' and a 'Browse' button.
- Registry type:** A dropdown menu with 'Thoracic' selected.
- Site ID:** An empty text box.
- Match on:** Radio buttons for 'MRN' (selected) and 'SSN'.
- Use external matching csv file:** An unchecked checkbox.
- External matching file location:** An empty text box and a 'Browse' button.
- Buttons:** 'OK' and 'Cancel' buttons at the bottom right.

Instructions inside the window: "Please generate a harvest file using your STS software, including MRNs for patient matching purposes. Once a harvest file is generated, use this application to insert the STS data into your local MPOG database."

MPOG Import

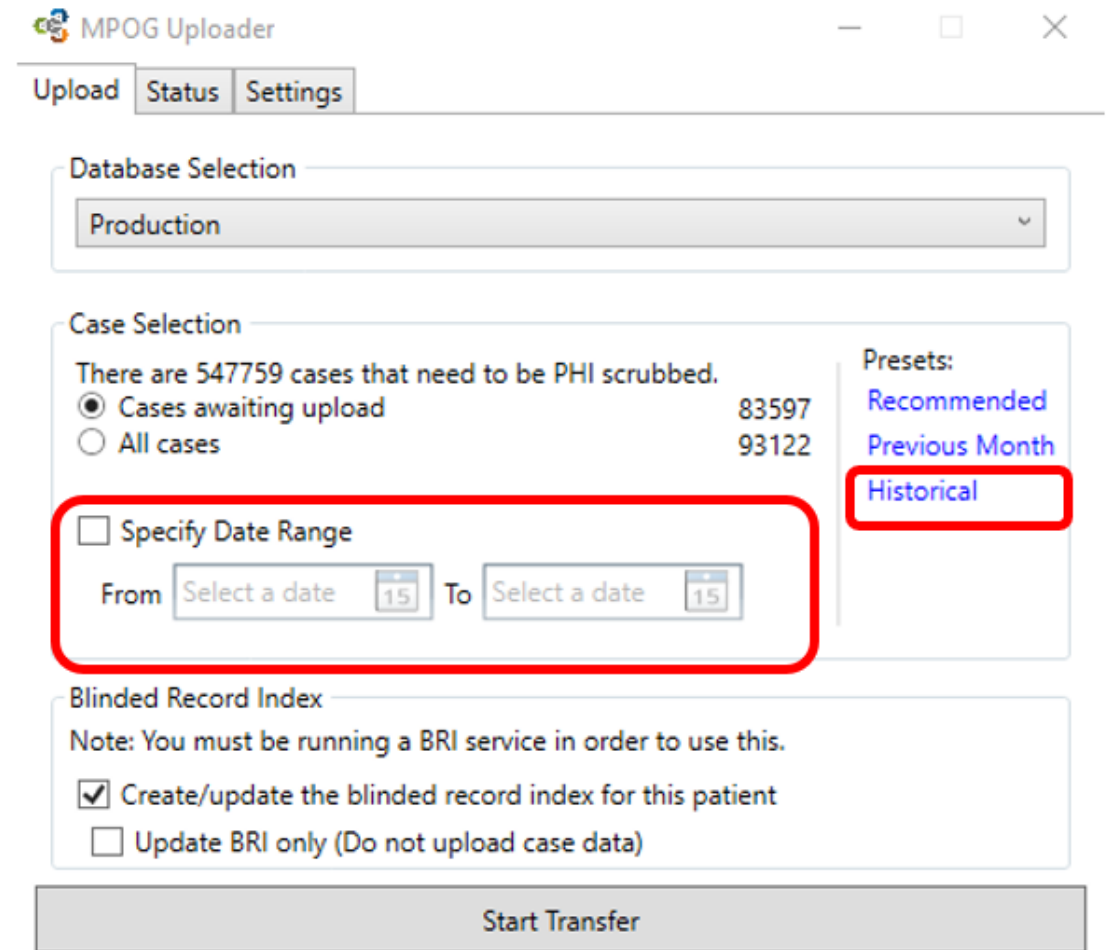

5. Click 'OK' to start the import process. The process will import the STS data into the local MPOG database, perform patient matching, and set any PHI scrubber flags and transfer flags appropriately.

After the process is complete, please run the PHI scrubber on "Cases Waiting for PHI scrub"

MPOG Import

6. To transfer the scrubbed STS records, please use the transfer application. Select the 'Historical' preset. You will also have to enter the dates that you want to transfer in the 'Specify Date Range' section.

The screenshot shows the MPOG Uploader application window. It has three tabs: 'Upload', 'Status', and 'Settings'. The 'Upload' tab is active. Below the tabs, there is a 'Database Selection' dropdown menu set to 'Production'. Under 'Case Selection', a message states 'There are 547759 cases that need to be PHI scrubbed.' There are two radio buttons: 'Cases awaiting upload' (selected) with a count of 83597, and 'All cases' with a count of 93122. To the right, under 'Presets', there are three links: 'Recommended', 'Previous Month', and 'Historical' (which is highlighted with a red box). Below this, there is a section for 'Specify Date Range' with a checkbox and two date pickers, both set to '15'. This entire section is also highlighted with a red box. At the bottom, there is a 'Blinded Record Index' section with a note: 'Note: You must be running a BRI service in order to use this.' It contains two checkboxes: 'Create/update the blinded record index for this patient' (checked) and 'Update BRI only (Do not upload case data)' (unchecked). At the very bottom is a large grey button labeled 'Start Transfer'.
