- Key Features
- Version 2.0 Demo

DataDirect Access

The screenshot shows the MPOG (Multicenter Perioperative Outcomes Group) website. The browser address bar displays 'mpog.org/#'. The website header includes the MPOG logo, navigation links (About, Join, Research, Quality, Apps, Downloads, Events / News), and a 'Dashboard Login' button. The main banner features a night cityscape and text for the 'Eighth Annual MPOG Retreat' at Renaissance Orlando Sea World on Friday, October 18, 2019, with a 'MORE INFO' button. A red box highlights the 'Apps' menu, which is open, showing a list of applications: Apps Menu, ASPIRE Dashboard, Basecamp, Case Reports, Concept Browser, DataDirect, Data Explorer, MQARK, Phenotype Browser, and Provider Contacts. A large red arrow points to the 'DataDirect' link in this menu.

- Pre-requisites:

- Authorization

MPOG DataDirect Security Checklist and Authorization Form

The screenshot shows the MPOG website's Downloads page. The browser address bar displays mpog.org/downloads/. The MPOG logo (Multicenter Perioperative Outcomes Group) is at the top center. The top navigation bar includes links for About, Join, Research, Quality, Apps, Downloads (highlighted with a red box), and Events / News. A 'Dashboard Login' button is also present. The main heading is 'Downloads'. Below this, there are two sections: 'Research' and 'Regulatory and Legal'. Under 'Research', there are four links: 'MPOG DataDirect Security Checklist and Authorization Form' (highlighted with a red arrow), 'DataDirect User Guide', 'PCRC Proposal Template', and 'PCRC Proposal Checklist'. Under 'Regulatory and Legal', there are six links: 'BAA Template for University of Michigan', 'IRB Approval Letter Coordinating Site (Expires 01-21-2020)', 'IRB Approval Letter Participating Site (Expires 12-16-2019)', 'IRB University of Michigan Performance Site Application Example', 'MPOG Bylaws', and 'MPOG Master DUA Agreement (Europe Only)'. At the bottom, there is a link for 'IT Job'.

MPOG DataDirect Security Checklist and Authorization Form

Thank you for your interest in using MPOGs DataDirect application for Quality Improvement and/or Research Projects at your institution. DataDirect contains limited dataset (protected health information is excluded except for date of service). However, because DataDirect may contain information regarding hospital level quality indicators (i.e. hospital mortality), we ask that approval from the appropriate hospital department (i.e. Quality or Health Information Management) is obtained.

Standard data security processes must be followed when using the application. These are detailed below.

The site's Anesthesiology Quality Champion and/or Practice Leader is responsible for all of the data that is downloaded for their institution from DataDirect. All individuals gaining access to MPOG DataDirect will need to complete and sign the affidavit below. This affidavit affirms that he/she understands the necessary processes and policies to ensure data security. Detailed descriptions of all items on the checklist can be found on the MPOG Security

Use of this data for Research

Anyone downloading data using Data Direct for the purpose of research should follow their institution review board policies.

Please do not hesitate to contact the MPOG with any questions/concerns.

Secure Computer

- Encrypt all mobile workstations (laptops): encrypt computer hard drive using approved tools (described on MPOG website)
- Ensure physical security or encryption of any desktop workstations
- Ensure physical security of servers: Institutional server room with near zero risk of physical theft

DataDirect Key Features

- Query Modes

- **Cohort Only**

- Goals:

- Determine if a research/QI question is **answerable**

- Sample size → roughly estimate **statistical power**

- Ensure a **satisfying experience** doing MPOG research or QI

- No prior approval

- (except login)

- **Multicenter** data (counts only)

DataDirect Key Features

- Query Modes

- Single Center Research / Quality Report

- Goal:

- Review cases, processes of care, and outcomes for local research and QI

- Approval from your site leadership

- Implied with DataDirect login, but user re-attests at time of access

- **Single center** data

DataDirect Key Features

- Query Modes

- **Multi-Center Research**

- Goal:

- Execute **high-impact multicenter research** for manuscripts / grants

- Approval from PCRC Committee

- Formal submission/review process

- **Multicenter** data

DataDirect Key Features

- Query Modes

	Access Requirements	Scope	Goal
Cohort Only	Login	Multicenter (counts)	Determine if question is answerable
Single Center Research / Quality Report			
Multicenter Research			

DataDirect Key Features

Multicenter Research	PCRC Approval	Multicenter	High-impact publications / grants

DataDirect v2.0 Updates

DataDirect v2.0

- Major updates
 - **Intuitive** workflow
 - Step-wise process
 - Differentiation between inclusion criteria vs. covariates/outcomes
 - **Broader range** of data types
 - MPOG concepts, phenotypes, QI measures all accessible
 - Automated, downloadable **data summaries**
 - QI: Quality Report
 - Research: Data Query Spec

DataDirect v2.0

- Rollout plan
 - Closed beta testing - contact us to join:

Comorbidities

Elixhauser comorbidity measures are pre-defined collections of ICD-9 and ICD-10 codes which assess for 31 patient comorbidities, commonly used for correlation to a higher risk of in-hospital mortality. The comorbidities are only available for centers contributing Problem Summary List ICD9/10 or Discharge ICD9/10 data. ICD-10 coding was initially developed by the World Health Organization in 1992, and the United States began requiring the use of ICD-10 coding October 1, 2015.

Diagnoses

Perioperative patient diagnoses are derived from billing sources (administrative or professional billing) or the clinician-entered problem summary list. Clinician-entered problem lists use problems linked to ICD-9 and ICD-10 codes. ICD-10 coding was initially developed by the World Health Organization in 1992, and the United States began requiring the use of ICD-10 coding October 1, 2015.

DataDirect v2.0

- Outputs
 - Single vs. Repeated Measures

Example		Values Returned
Single Measures (One value per case)		
Repeated Measures (Many values per case)		

DataDirect v2.0

- Outputs
 - Single vs. Repeated Measures

	Example	Values Returned
Single Measures (One value per case)	Age	MPOG Case ID, MPOG Patient ID, Date of Procedure, Value
Repeated Measures (Many values per case)		

DataDirect v2.0

- Outputs
 - Single vs. Repeated Measures

	Example	Values Returned
Single Measures (One value per case)	Age	MPOG Case ID, MPOG Patient ID, Date of Procedure, Value
Repeated Measures (Many values per case)	Blood pressure	MPOG Case ID, MPOG Patient ID, BP Source, Dates/Times of Measurements, Values

... some parting thoughts on data wrangling in MPOG

MPOG Data Wrangling

- Commonly **structured**, or with **cleanable artifact**:
 - Demographics – height, weight, gender, age, etc.
 - Simple case details – ASA class, Anesthesia CPT, duration
 - Simple anesthetic details – GA, ETT/LMA attempted
 - *Elixhauser* comorbidities, ICD-9/10 diagnosis codes
 - *Intraoperative* medications
 - *Standard* physiologic monitors
 - Laboratory values

MPOG Data Wrangling

- Sometimes unstructured, or with complex artifact:
 - Surgical diagnosis and/or procedure text
 - Nuanced intraoperative interventions
 - e.g. positioning, awake/deep extubation, jet ventilation, partial CPB
 - *Anesthesia H&P* comorbidities
 - *Non-intraoperative* medications (e.g. home, preop, postop)
 - *Advanced* physiologic monitors (e.g. CVP, cerebral oximetry)

MPOG Data Wrangling

**Usually Structured,
Cleanable**

**Sometimes Unstructured,
Cleaning is Challenging or Intractable**

Demographics, Labs

MPOG Data Wrangling

Advanced Monitors (e.g. CVP)

Take-Home Points

- DataDirect can catalyze research/QI, without needing:
 - ... to be a computer programmer
 - ... to be a 1st-degree relative of your hospital's CMIO
- DataDirect **query modes** can be tailored to use-case:
 - Cohort ID mode → Research/QI “speed dating”
 - Single Center Research/QI → Improve care at your hospital
 - Multicenter Research → High-impact science

Next Steps

- DataDirect
 - Access: Downloads → DataDirect Security Checklist & Authorization
 - v2.0 beta testing: e-mail mpog-research@med.umich.edu

Thank You
