

**ASPIRE Quarterly Meeting Quality Committee Meeting Notes**  
**Lansing MI, 3/18/16**

- Approval of minutes from 2/29 meeting.
- Working on developing TOC measures- will send out via listserv for comment & finalize at a future meeting.
- Former PPAI group education modules are being finalized and should be posted in the next couple of weeks on the website.
- Year 2 sites are on track- making good progress.
- QCDR status: more sites plan to participate in 2016. SJMHS-A2, Chelsea, Livingston, Beaumont-RO, Troy, FH, Dearborn, Taylor, Grosse Point, Holland and Sparrow. If all cohort 2 sites stay on schedule, will not be an issue. Will develop alternative plan if they fall behind.
- NPSF released article in Feb 2016 regarding recommendations for NMB monitoring & neostigmine reversal guide. Will post on the ASPIRE website.
- AHRQ Physician feedback article discussed. Design and manner of implementation are the most important components for creating physician feedback reports that are effective. Aligns well with ASPIRE goals and processes.
- Measure Review
- TEMP 01 and TEMP 02 discussion:
- Sessler article: Summary- Body temp should be measured in all patients receiving anesthesia
  - o Core vs skin temperature: see slides for sites that will be accepted for TEMP measures.
  - o Even mild hypothermia can lead to complications.
  - o Substantial hypothermia often goes undetected
  - o TEMP 01: discussion on whether or not to exclude c-sections. Less than majority of group vote to exclude as cases with <60 minutes are already excluded.
  - o TEMP 02: Consider accepting 1 temp capture as success for cases <60 minutes & requiring > 1 temp documented for cases >60min.
  - o TEMP 02: exclude neuraxial cases (c-sections too).
  - o Going to add article re: nasopharyngeal vs esophageal temperatures (?), to website.
  - o Action Item: Sachin will follow-up with Dr. Halstrom (orthopedics) re: neuraxial and Bair Huggers
