

- Removed unmapped labs from the main chart
- Updated logic for PACU and preop time sections
- Added a variety of sections: TOC, ABX, General-ETT, General-LMA, General-Sedation:

- Record search now supports undo (CTRL+Z)
- Record search now supports filtering by original variable ID and name
- Added a text search to table view

AIMS\_IntraopMedications

- Time in the record list will use entered time if observed time is unavailable
- Display PHI option now global across tabs
- Bug fix: Records with a blank observed time no longer display as 1/1/0001
- Bug fix: Notes with many details will now properly scroll
- Bug fix: billing records are now properly visible in record search
- Bug fix: Scrolling issue in the labs tab
