⬆ Description

Percentage of cases with labs related to Coronavirus. Check extract or mapping if percentage is low

Concepts Used:

- ▾ COVID-19 Labs
  - 3404 Immunology - Antibody - COVID19 - IgG
  - 5179 Virology - Coronavirus (SARS-CoV-2)

- PONV diagnostic will now use entered time on notes if observed time is unavailable
- Bug fixes
  - Previous attestation graph now display background properly
  - Bar chart attestations no longer freeze the application
  - “Not Accurate” attestation button description no longer cut off

### IM Assistant

- Now opens as a smaller window to prevent being cut off on smaller resolution screens

### Variable Mapper

- Importing variable spreadsheets now allows for rejecting individual mappings
- Importing mappings now has a completion message when new mappings have been applied
- Added instance filter and ability to search by original variable id (use ID: prefix); must be exact match
