

## MPOG App Suite Release – December 2024

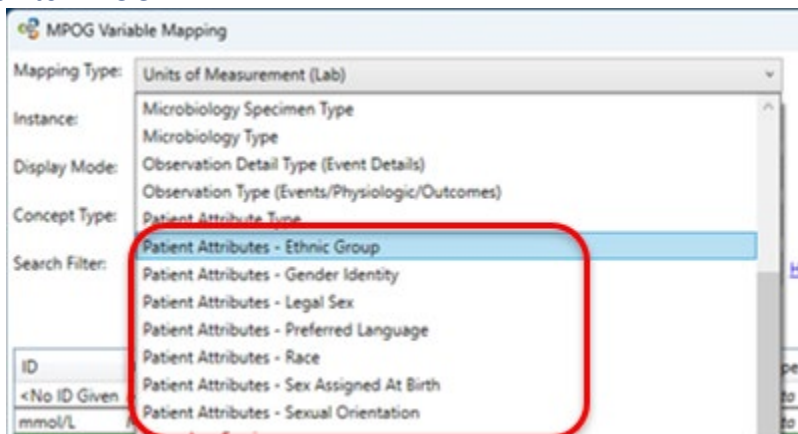

### How to apply the upgrade:

The upgrade package will be sent to each site's IT contact.

- For sites using Desktop Virtualization (e.g. Citrix), your IT team will upgrade the App Suite.
- For sites where the App Suite is installed on PCs, your IT team will distribute the installer to all individuals after the database upgrade has been applied. Once you have received the installer from your IT team, follow the install instructions [here](#).

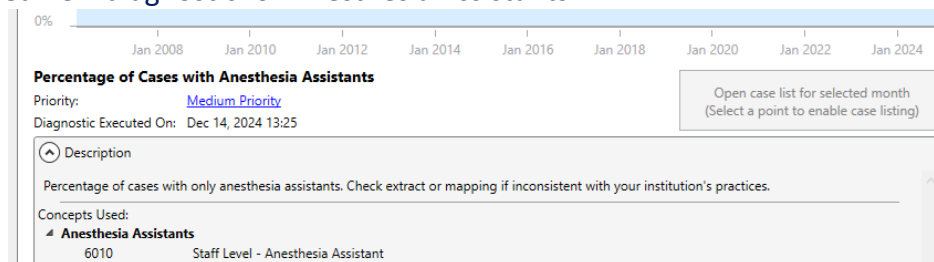

### DATA TYPES

- Patient Attributes, allowing for greater detail in patient demographic information, is now available. This is optional and may require a supplemental extract. You will not see data in these categories unless your site opts to extract this new data type for submission to MPOG.

### DATA DIAGNOSTICS

- Added new diagnostic for Anesthesia Assistants

- Retired old individual airway diagnostics in favor of a single combined airway diagnostic
- Updated various diagnostics with new lab unit concepts

**CASE VIEWER**

- Updated concepts in H&P section
- Fixed bug where “Case Linked” column in the Pro Fee Diagnosis section under the Administrative tab did not display correctly
- Propofol infusion in the case chart are now converted to display in mg instead of mcg

PROPOFOL		50 mg		50 mg
----------	--	-------	--	-------

- Updated concept presets in the case chart and global search sections
- Added Microbiology tab. This is optional and may require a supplemental extract. You will not see microbiology data unless your site opts to extract this new data type for submission to MPOG.

Procedure Type	Component Type	Specimen
Unmapped Variable	Component - Gram Stain	Unmapped Variable
Culture - Blood	Component - Culture/Smear	Specimen - Blood
Culture - Urine	Component - Culture/Smear	Specimen - Urine, cath
Culture - Blood	Component - Culture/Smear	Specimen - Blood
Culture - Respiratory	Component - Gram Stain	Unmapped Variable
Culture - Respiratory	Component - Culture/Smear	Unmapped Variable
Culture - Respiratory	Component - Gram Stain	Specimen - Sputum, asj

- Months in listed dates are now displayed using words (e.g. January 01, 2025)

Time	Mapped As
Nov 06, 2024 12:14	Patient Available
Nov 06, 2024 12:20	Patient Available
Nov 06, 2024 12:37	Patient Identified (ID Band)

**CASE VALIDATION**

- Added new concepts to glucose question

**NSQIP IMPORT**

- Removing header metadata has been increased to 50 rows

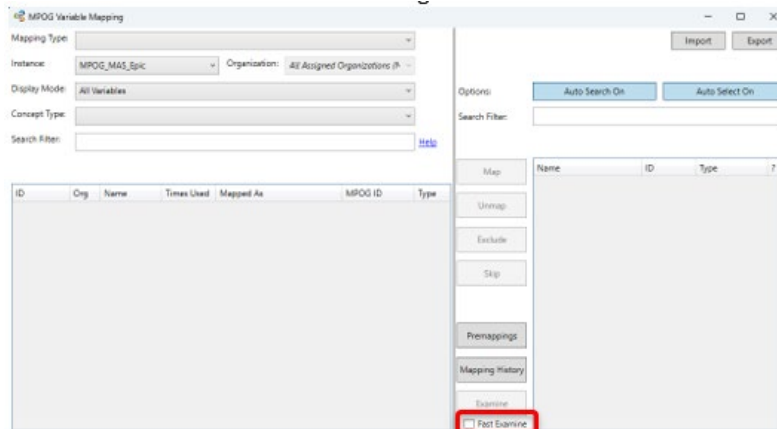

**STS IMPORT**

- Fixed bugs related to changes in the STS harvest file

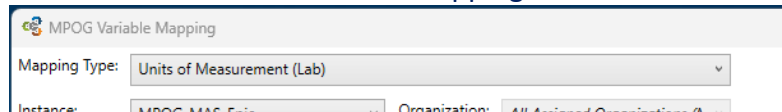

## VARIABLE MAPPING

- Examine button now includes a “fast mode” setting for sites with large variable counts.
  - Results are random instead of being most recent.

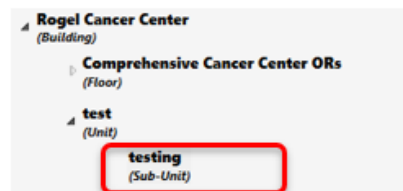

- Updated pre-mappings
- Lab units of measure are now available for mapping

## LOCATION MAPPING

- Added new “Sub-Unit” location type

## TRANSFER TO MPOG CENTRAL

- Upload protocol has been revised. Out of memory issues should be less of an issue.
- Users no longer need to select an upload destination for uploading to TEST vs. PROD
